### **About This Content**

### **3DMark Time Spy**

Time Spy is a DirectX 12 benchmark test for gaming PCs running Windows 10. With its pure DirectX 12 engine, built from the ground up to support new API features like asynchronous compute, explicit multi-adapter, and multi-threading, Time Spy is the ideal benchmark for testing the DirectX 12 performance of modern graphics cards.

I bought this DLC as part of a bundle back in 2013. Now they want to charge me again for it. How is that fair? It's still the same DLC but now it won't let me use any of the advanced benchmarks. This is a total money grab and BS.
